## AUTOMATION SOLUTIONS

Fluid Power South supports Georgia OEMs, machine users, and resellers with products to suit a variety of challenges, material needs, and budgets. At no charge, we will:

- Identify the products you need or recommend an effective, less-expensive alternative.
- Design an automation solution for your business.
- Use our inventory stocking and manufacturer relationships to fill your order quickly.

We sell by sharing expertise and prioritizing service. It's why our staff spends nearly 90% of its time on site with customers and why leading manufacturers regularly award us for our sales performance.

## ABOUT FLUID POWER SOUTH

Fluid Power South is an established, family-owned distributor and seller of automation components. We have been serving Georgia OEMs, machine users, and resellers for nearly four decades. Our work helps companies of all sizes—from **growing manufacturers to Fortune 500 businesses**—create products and generate billions of dollars in revenue each year.

**Fluid Power South is sized for service:** we offer the resources that leading manufacturers and OEMs require without sacrificing the customer support they deserve. We've been successful over the years because we share our expertise, prioritize our partners, and sell quality products.

Whether you want to purchase a specific **automation component product** or would like guidance **designing an automation solution**, we invite you to **get in touch**.

## WHY COMPANIES CHOOSE FLUID POWER SOUTH

### SOLUTION SELLING

**Buy a solution—not a part.** At no charge, we will come to your location and help you plan an application for almost any manufacturing challenge.

### CUSTOMER SERVICE

**Over 50% of our customers have been with us for 10+ years.** A big reason: we respond quickly to their needs in person, by phone, and by email.

### EXPERTISE

Our sales staff attends yearly training with leading component manufacturers to **advise you better about products, pricing, and applications.**

### EXPERIENCE

With almost **four decades in business**, we offer reliability and proven success. Component manufacturers regularly recognize us with **Top 10 and regional awards.**

### EFFICIENCY

We use the top industrial distribution software to provide faster, more accurate service. We also support emergency needs and stocking inventory.

### QUALITY

As a family business, **integrity is essential**, especially in our products. That's why we sell **premium components** from manufacturers like **Bimba, Tolomatic, and Panasonic.**

## OUR HISTORY

John C. Wells Sr. and Margaret Wells started Fluid Power South, Inc. in 1976 with a small team and a resolute commitment to serving Georgia-area manufacturers, OEMs, and resellers. Supported by son John Jr., daughter Cathy, and wife Margaret, John Sr. and his team began acquiring product lines and developing relationships with customers.

Over the years, Fluid Power South found success with both traditional manufacturing products and newer automation components that eventually became the technology of choice for customers. Today, the second generation of the Wells family leads Fluid Power South, and the company counts among its customers global manufacturing giants Mohawk, Shaw, The Coca-Cola Company, Caterpillar, and Delta.
